Dengerink Administration Building (VDEN), # 207  
14204 NE Salmon Creek Avenue  
Vancouver, WA 98686

Dear Max:

Thank you for making time to meet with me last week at Washington State University Vancouver's new Strategic Partnerships Offices. What a great space - and it is right in the middle of all that is happening in Vancouver, Washington!

I would like to more appreciably explore an idea that we discussed. A joint coordination between my Vancouver-based community group, Get Hired (Tech and Healthcare)<sup>1</sup>, and Washington State University would serve our respective stakeholders, including the community at-large.

Get Hired (Tech and Healthcare) **educates job seekers to get hired by bringing community to businesses, and businesses to the community.** Our mission embodies both

1. The spirit of Washington State University's mission as "a public research university committed to its land-grant heritage and tradition of service to society"; and
2. Washington State University's strategic plan, *Drive to 25*, that, in part, promotes "discovery, teaching, and engagement..."

The following pages are intentional to the extent that, together, this binding is not a formal document. The purpose is simply to outline the would-be features of a joint coordination and prove such a partnership would be worth considering further. I welcome your questions, and encourage your ideas and input into an eventual, coordinated strategy.

Sincerely,

Cosigned,

Max Crismon
